<p>Investment strategy</p>	<p>The Scheme will invest predominantly in Equity and Equity Related Instruments of Large Cap companies with strong growth and sustainable business models, whilst managing risk. The portfolios will be built utilising a bottom-up stock selection process, focusing on appreciation potential of individual stocks from a fundamental perspective. The AMC employs a "Fair value" based research process to analyse the appreciation potential of each stock in its universe (Fair value is a measure of the intrinsic worth of a company). The universe of stocks is carefully selected to include companies having robust business models and enjoying sustainable competitive advantages as compared to their competitors.</p>	<p>The Scheme will invest in a diversified portfolio of strong growth companies with sustainable business models. Though the benchmark is S&P BSE-200, the investments will not be limited to the companies constituting the benchmark. The Scheme will have the flexibility to invest across the market capitalization spectrum (i.e. large, mid and small cap companies) and across industries/ sectors. The companies would be individually researched and selected only when the fund management team has satisfied itself on robustness of the company's business model, sustainability of its competitive advantage and the credibility of its top management team. The Scheme will endeavor that the corpus of the Scheme remains fully invested in equity and equity-related instruments at all times.</p>														
<p>Risk profile of the scheme</p>	<p>Mutual Fund units involve investment risks including the possible loss of principal. Scheme specific Risk Factors are summarized below: The scheme carries risks associated with investing in equity and equity related securities, derivatives, foreign securities, debt securities, securitized debt, money market instruments, short selling and securities lending. Investment in Mutual Fund units involves investment risks such as trading volumes, settlement risk, liquidity risk and default risk. Trading volume may restrict liquidity in equity and debt investments. The AMC may choose to invest in unlisted securities which may increase the risk on the portfolio. Also, the value of the Scheme investments may be affected by interest rates, currency exchange rates, changes in law/policies of the government, taxation laws and political, economic or other developments. Investments in debt and money market instruments are subject to interest rate risk, re-investment risk, basis risk, credit risk, spread risk, prepayment risk, etc. to the extent of the Scheme's investments in such securities. Please refer to the SID for further details.</p>	<p>Mutual Fund units involve investment risks including the possible loss of principal. Differentiation with existing open ended hybrid schemes (as on April 30, 2019)	For comparison of Existing Schemes, Investment Objective, Asset Under Management (AUM) and number of folios, please refer to point no. 7B on page 27 to 28.	Axis Triple Advantage Fund, an open ended hybrid fund is not a minor modification of any other existing scheme/product of Axis Mutual Fund. Further, the existing products of Axis Mutual Fund are either debt, liquid or equity funds and hence the 'hybrid fund' under consideration cannot be compared with any other existing schemes. For details on other hybrid schemes, please refer to point no. 7B on page 27 to 28.																		
Investment strategy	The Scheme seeks to generate regular income through investments in debt & money market instruments, along with capital appreciation through equity and equity related instruments. Within equities and fixed income, the portfolio would be actively managed to optimize returns within the respective asset class.	The scheme seeks to provide superior risk adjusted returns through diversification across various asset classes such as equity, fixed income & gold that have historically shown low correlation with each other.																		
Risk profile of the scheme	<p>Mutual Fund units involve investment risks including the possible loss of principal.</p> <p>Scheme specific Risk Factors are summarized below: The Scheme carries risks associated with investing in equity and equity related securities, derivatives, debt and money market securities, foreign securities, securitized debt, short selling and securities lending.</p> <p>Investment in Mutual Fund units involves investment risks such as trading volumes, settlement risk, liquidity risk and default risk. The AMC may choose to invest in unlisted securities which may increase the risk on the portfolio. Also, the value of the Scheme investments may be affected by currency exchange rates, changes in law/policies of the government, taxation laws and political, economic or other developments. Investments in debt and money market instruments are subject to interest rate risk, re-investment risk, basis risk, credit risk, spread risk, prepayment risk, etc. Equity and equity related instruments are volatile by nature.</p> <p>Investments in 'REIT' & 'InvIT' have risks associated with price-risk, credit risk, liquidity and marketability, re-investment risk and risk of lower than expected distributions.</p> <p>The name of the Scheme should in no way be construed as a guarantee or assurance of returns or capital invested in the scheme.</p> <p>Please read the SID carefully for details on risk factors before investment.</p>	<p>Mutual Fund units involve investment risks including the possible loss of principal.</p> <p>Scheme specific Risk Factors are summarized below: The Scheme carries risks associated with investing in equities, fixed income instruments, derivatives, foreign securities, securitized debt, Gold Exchange Traded Funds, short selling and securities lending.</p> <p>Investment in Mutual Fund units involves investment risks such as trading volumes, settlement risk, liquidity risk and default risk. Risk management strategies	<p>The term 'Regular Saver' is only meant to denote the dual objectives of delivering regular returns and the endeavor to manage risk. The name of the scheme should in no way construed as a guarantee or assurance of returns or capital invested in the scheme. The scheme would endeavor to manage the risk through its portfolio construction and investment processes.</p> <p>The investment team of the AMC will carry out rigorous in-depth credit evaluation of the money market and debt instruments (other than GSecs) proposed to be invested in. The credit evaluation will essentially be a bottom-up approach and include a study of the operating environment of the issuer, the past track record as well as the future prospects of the issuer and the short term/long term financial health of the issuer.</p> <p>With respect to the equity component, the Scheme would invest in a diversified portfolio of equity and equity related securities which would help alleviate the sector/ market capitalization related concentration risk.</p> <p>The AMC endeavours to invest in REITs/InvITs, where adequate due diligence and research has been performed. The Scheme also relies on its own research as well as third party research. This involves one-to-one meetings with the managements, attending conferences and analyst meets and also tele-conferences. The analysis will focus, amongst others, on the predictability and strength of cash flows, value of assets, capital structure, business prospects, policy environment, strength of management, responsiveness to business conditions, etc.</p> <p>The AMC has experienced investment professionals to help limit investment universe to carefully selected high quality businesses.</p> <p>The AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process, which would be periodically evaluated. The Scheme will also use derivatives and other hedging instruments, as may be permitted by SEBI and RBI, from time to time, in order to protect the value of the portfolio. The risk control process involves identifying & measuring the risk through various Risk Measurement Tools.</p>	<p>The investment team of the AMC will carry out rigorous in-depth credit evaluation of the money market and debt instruments (other than GSecs) proposed to be invested in. <p>Investment strategy</p>	<p>The scheme seeks to generate capital appreciation through an actively managed diversified portfolio of primarily larger Midcap companies. The portfolio will be built utilising a bottom-up stock selection process, focusing on appreciation potential of individual stocks from a fundamental perspective.</p>		<p>The scheme aims to generate long term capital appreciation by investing in a concentrated portfolio of equity & equity related instruments of up to 25 companies. In order to have a concentrated portfolio, the scheme will follow a bottom-up stock selection approach. The portfolio will be built utilising a bottom-up stock selection process, focusing on appreciation potential of individual stocks from a fundamental perspective. The AMC employs a "Fair value" based research process to analyse the appreciation potential of each stock in its universe (Fair value is a measure of the intrinsic worth of a company). The universe of stocks is carefully selected to include companies having robust business models and enjoying sustainable competitive advantages as compared to their competitors. While 65% - 100% of the corpus will be invested in equities (no less than 20 companies and up to 25 companies), it is expected that under normal market conditions at least 80% of the corpus will be invested in equities (no less than 20 companies and up to 25 companies). The Scheme will primarily invest in companies among the top 200 in terms of market cap.</p>															
<p>Risk profile of the scheme</p>	<p>Mutual Fund units involve investment risks including the possible loss of principal. Please read the Scheme Information Document (SID) carefully for details on risk factors before investment. Scheme specific risk factors are summarized below: The scheme carries risks associated with investing in equity and equity related securities, derivatives, foreign securities, debt securities, securitized debt, money market instruments, short selling and securities lending. Investment in Mutual Fund units involves investment risks such as trading volumes, settlement risk, liquidity risk and default risk. Trading volume may restrict liquidity in equity and debt investments. The AMC may choose to invest in unlisted securities which may increase the risk on the portfolio. Also, the value of the Scheme investments may be affected by interest rates, currency exchange rates, changes in law/policies of the government, taxation laws and political, economic or other developments. Mid & small size companies may be more volatile & less liquid than larger companies. Investments in debt and money market instruments are subject to interest rate risk, re-investment risk, basis risk, credit risk, spread risk, prepayment risk, etc. to the extent of the Scheme's investments in such securities. Please refer to the SID for further details.</p>		<p>Mutual Fund units involve investment risks including the possible loss of principal. The AMC has incorporated adequate safeguards to manage risk in the portfolio construction process. The risk control process involves identifying & measuring the risk through various Risk Measurement Tools. Further, the AMC has implemented the Bloomberg Portfolio Management System as Front Office System (FOS) for managing risk. The system has inbuilt features which enables the Fund Manager to calculate various risk ratios and analyze the same. The AMC has experienced investment professionals to help limit investment universe to carefully selected high quality businesses. The fund manager would also consider hedging the portfolios in case of predictable events with uncertain outcomes.</p>

	The option premium shall be for the purpose of exposure to derivative instruments which shall be restricted to long call options. In such cases, the total exposure related to option premium paid shall not exceed 20% of the net assets of the scheme. Moreover, this upper limit of 20%, for investments in options premium, if any, shall be applicable only at the time of investment. If due to market actions the value of options appreciates/ depreciates resulting in breach of the limit of 20%, the fund manager may or may not rebalance the portfolio and may run with the ongoing exposure. However, if the fund manager sells the option before expiry of the contract, the reinvestment, if any, would be subject to the maximum 20% limit on options premium.		#The Scheme may also use derivatives for such purposes as may be permitted by the Regulations, including for the purpose of hedging and portfolio balancing, based on the opportunities available and subject to guidelines issued by SEBI from time to time. The Scheme may also use fixed income derivative instruments subject to the guidelines as may be issued by SEBI and RBI and for such purposes as may be permitted from time to time.

	Subject to the Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute. These proportions can vary substantially depending upon the perception of the fund manager; the intention being at all times to seek to protect the interests of the Unit holders. Such changes in the investment pattern will be for short term and for defensive considerations only. In the event of deviations, the fund manager will carry out rebalancing within 30 days. Where the portfolio is not re-balanced within 30 days, justification for the same shall be placed before the Investment Review Committee and reasons for the same shall be recorded in writing. The Investment Review Committee shall then decide on the course of action. However, at all times the portfolio will adhere to the overall investment objectives of the Scheme.		Equity and Equity related securities# of which	20-70 %
			i) Equities & equity related instruments (unhedged)*	20-45%
			ii) Equities, equity related instruments and derivatives including index futures, stock futures, index options & stock options etc. as part of hedged / arbitrage exposure*	0-25%
			Debt & Money Market Instruments#\$	30-80 %
			*Equity allocation is measured as the Gross Exposure to equities, equity related instruments and derivatives. The scheme will enter into derivatives transactions for hedging. The derivative positions will be hedged against corresponding positions in either equity or derivative markets depending on the strategies involved and execution costs. On the total portfolio level the Scheme does not intend to take a net short exposure to equity markets. Unhedged positions in the portfolio (investments in equity shares without corresponding exposure to equity derivative) shall not exceed 45% of the net assets.	
			#The Scheme may also use derivatives for such purposes as may be permitted by the Regulations, including for the purpose of hedging and portfolio balancing, based on the opportunities available and subject to guidelines issued by SEBI from time to time. The Scheme may also use fixed income derivative instruments subject to the guidelines as maybe issued by SEBI and RBI and for such purposes as may be permitted from time to time.	
			\$ Investment in Securitized debt, if undertaken, would not exceed 20% of the net assets of the Scheme. The scheme may undertake repo transactions in corporate debt securities in accordance with the directions issued by RBI and SEBI from time to time. Such investment shall be made subject to the guidelines which may be prescribed by the Board of Directors of the Asset Management Company and Trustee Company. Pending deployment of the funds in securities in terms of investment objective of the Scheme, the AMC may park the funds of the Scheme in short term deposits of the Scheduled Commercial Banks, subject to the guidelines issued by SEBI vide its circular dated April 16, 2007, as may be amended from time to time.	
			Subject to the Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute. These proportions can vary substantially depending upon the perception of the fund manager; the intention being at all times to seek to protect the interests of the Unit holders. Such changes in the investment pattern will be for short term and for defensive considerations only. In the event of deviations, the fund manager will carry out rebalancing within 30 Calendar Days. Where the portfolio is not rebalanced within 30 calendar Days, justification for the same shall be placed before the Investment Review Committee and reasons for the same shall be recorded- in writing. The Investment Review Committee shall then decide on the course of action. However, at all times the portfolio will adhere to the overall investment objectives of the Scheme.

<p>Investment strategy</p>	<p>The scheme will seek to achieve its investment objective primarily by employing various strategies which seek to exploit absolute returns opportunities in equity and derivative markets. In case such opportunities are not available, the scheme will invest the corpus in debt and money market instruments.</p> <p>The equity and derivative markets have experienced enormous growth in India in the last few years. The market provides the investor the ability to derive returns from the various strategies enumerated below. The market is not always efficient to the extent of mispricing in the derivative market and the underlying cash market. These techniques differ in that each method attempts to exploit a different form of imperfection in the underlying equity, debt and derivatives market and thus expose the investor to different forms of risk.</p>	<p>The scheme has a dual objective of providing capital appreciation and income distribution to the investors by using equity and equity related instruments, arbitrage opportunities, and investments in debt and money market instruments. The scheme seeks to benefit from the concept of asset allocation. The aim of asset allocation is to provide superior risk adjusted returns through diversification across various asset classes like equity, fixed income & arbitrage which have historically had low correlation with each other.</p> <p>Equity and Equity Related Instruments: The equity allocation will be managed actively. The focus would be to build a diversified portfolio of strong growth companies, reflecting our most attractive investment ideas, at all points of time. The portfolio will be built utilizing a bottom-up stock selection process, focusing on appreciation potential of individual stocks from a fundamental perspective. The AMC employs a "Fair value" based research process to analyse the appreciation potential of each stock in its universe (Fair value is a measure of the intrinsic worth of a company). The universe of stocks is carefully selected to include companies having robust business models and enjoying sustainable competitive advantages as compared to their competitors. The Fund will have the flexibility to invest across the market capitalization spectrum. The Fund by utilizing a holistic risk management strategy will endeavor to manage risks associated with investing in equity markets.</p> <p>The Fund has identified the following risks and designed risk management strategies, which are embedded in the investment process to manage these risks</p> <ol style="list-style-type: none"> Quality Risk - Risk of investing in unsustainable / weak companies. Price Risk - Risk of overpaying for a company Liquidity Risk - High Impact cost of entry and exit Volatility Risk - Volatility in price due to company or portfolio specific factors Event Risk - Price risk due to a company / sector specific or market event <p>Fixed Income: The Scheme proposes to invest in a diversified portfolio of high quality debt and money market instruments to generate regular income. The fund manager will allocate the assets of the scheme taking into consideration the prevailing interest rate scenario & the liquidity of the different instruments. The portfolio duration and credit exposures will be decided based on a thorough research of the general macroeconomic condition, political and fiscal environment, systemic liquidity, inflationary expectations, corporate performance and other economic considerations. The fund manager will keep in mind the yield structure of different asset classes (e.g. the sovereign yield curve and the corporate bond yield curve) as well as the kinks within a particular yield curve (e.g. the different points of the sovereign yield curve) while making investment decisions.</p> <p>Cash-Futures Arbitrage: The fund would look for market opportunities between the spot and the futures market. The cash futures arbitrage strategy can be employed when the price of the futures exceeds the price of the underlying stock. The fund would first buy the stocks in cash market and then sell in the futures market to lock the spread known as arbitrage return. Buying the stock in cash market and selling the futures results into a hedge where the fund have locked in a spread and is not affected by the price movement of cash market and futures market. The arbitrage position can be continued till expiry of the future contracts. The future contracts are settled based on the last half an hour's weighted average trade of the cash market. Thus there is a convergence between the cash market and the futures market on expiry. This convergence helps the fund to generate the arbitrage return locked in earlier. However, the position could even be closed earlier in case the price differential is realized before expiry or better opportunities are available in other stocks.</p>
<p>Risk profile of the scheme</p>	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment.</p> <p>Scheme specific Risk Factors are summarized below:</p> <p>The scheme carries risks associated with investing in equity and equity related securities, derivatives, debt and money market securities, securitized debt, short selling and securities lending.</p> <p>No assurance can be given that the Fund Manager will be able to locate investment opportunities or to correctly exploit price discrepancies in the capital markets. Reduction in mispricing opportunities between the Cash Market and Future and Options market may lead to lower level of activity affecting the returns.</p> <p>In case of a large redemption, the scheme may need to reverse the spot-futures transaction before the date of futures' settlement. This eventuality may lead to basis risk.</p> <p>Investment in mutual fund units involves investment risks such as trading volumes, settlement risk, liquidity risk and default risk. Trading volume may restrict liquidity. The AMC may choose to invest in unlisted securities which may increase the risk on the portfolio. Also, the value of the Scheme investments may be affected by currency exchange rates, changes in law/policies of the government, taxation laws and political, economic or other developments.</p> <p>Investments in debt and money market instruments are subject to interest rate risk, re-investment risk, basis risk, credit risk, spread risk, prepayment risk, etc.</p> <p>Please refer to the SID for further details.</p>	<p>The scheme attempts to manage risk through active asset allocation. According to detailed historical analysis done by the AMC, such a scheme is able to generate a much lower risk profile compared to a 100% equity investment strategy. However there is no certainty that the active asset allocation approach will be able to deliver the risk management going forward.</p> <p>Investments in 'REIT' & 'InvIT' have risks associated with price-risk, credit risk, liquidity and marketability, re-investment risk and risk of lower than expected distributions.</p> <p>Please refer to the SID for further details.</p>
<p>Risk management strategies</p>	<p>In comparison to an equity fund, there are certain additional risks which are associated with an arbitrage fund and the mitigants to such risks are as follows:</p> <p>Lack of arbitrage opportunities: The Fund will enter into arbitrage trades when such opportunities are available. If the yields on arbitrage are low, the fund would invest in debt securities and money market instruments.</p> <p>Price Risk: While arbitrage is a low risk strategy, there would be periods when the equity and derivatives market may not move perfectly in sync. However, these movements are temporary and at the time of expiry of derivatives the prices converge.</p> <p>Un-hedged positions in the portfolio (investments in equity shares without corresponding exposure to equity derivative) shall not exceed 10%. Also, the AMC has a team of experienced investment professionals and uses systems so that risks are managed effectively.</p>	<p>Risk management is going to be an integral part of the investment process. Effective risk management is critical to fund management for achieving financial soundness. Investments by the Scheme shall be made as per the investment objectives of the Scheme and provisions of the Regulations.</p> <p>The AMC endeavours to invest in REITs/InvITs, where adequate due diligence and research has been performed. The Scheme also relies on its own research as well as third party research. This involves one-to-one meetings with the managements, attending conferences and analyst meets and also tele-conferences. The analysis will focus, amongst others, on the predictability and strength of cash flows, value of assets, capital structure, business prospects, policy environment, strength of management, responsiveness to business conditions, etc.</p>
<p>Plans and Options</p>	<p>Plans: Regular Plan & Direct Plan Option: Growth Option & Dividend Option (Payout and Reinvestment) Default Plan: Default Option: Growth Default Facility: Dividend Reinvestment Facility</p> <p>Default Plan:</p> <p>The investor must clearly specify his choice of plan. Investors subscribing under Direct Plan of a Scheme will have to indicate "Direct Plan" against the Scheme name in the application form. Investors should also indicate "Direct" in the ARN column of the application form. Further, if neither Distributor code is mentioned in the application form, nor Plan is indicated against the Scheme name, the application will be processed under Direct Plan. The investors may refer to the following table for applicability of Direct Plan/ Regular Plan under different scenario :-</p>	<p>Plans: Regular Plan & Direct Plan Option: Growth Option & Dividend Option [Monthly (Payout and Reinvestment), Quarterly (Payout and Reinvestment) & Regular (Payout and Reinvestment)]. Provided further that amount incurred as expense on account of inflows from such cities shall be credited back to the scheme in case the said inflows are redeemed within a period of one year from the date of investment. Provided further that, expenses charged under this clause shall be utilized for distribution expenses incurred for bringing inflows from such cities. Provided further that, additional TER can be charged based on inflows only from retail investors from B30 cities in terms of SEBI circular no. SEBI/HO/IMD/DF2/CIR/P/2018/137 dated October 22, 2018 read with SEBI/HO/IMD/DF2/CIR/P/2019/42 dated March 25, 2019. For this purpose inflows of amount upto ₹ 2,00,000/- per transaction, by individual investors shall be considered as inflows from "retail investor". (b) additional expenses, incurred towards different heads mentioned under Regulations 52(2) and 52(4), not exceeding 0.05 per cent of daily net assets of the scheme; (c) GST payable on investment and advisory service fees ('AMC fees') charged by Axis Asset Management Company Limited ('Axis AMC'); Further, brokerage and transaction costs which are incurred for the purpose of execution of trade and is included in the cost of investment shall not exceed 0.12 per cent in case of cash market transactions and 0.05 per cent in case of derivatives transactions. B. Within the Total Expense Limit chargeable to the scheme, following will be charged to the Scheme: (a) GST on other than investment and advisory fees, if any, (including on brokerage and transaction costs on execution of trades) shall be borne by the Scheme (b) Investor education and awareness initiative fees of at least 2 basis points on daily net assets of respective Scheme. C. AMC fees charged by Axis AMC to the Scheme will be within the Total Expense Limit as prescribed by SEBI Regulations, with no sub-limit on said AMC fees. Expenses over and above the prescribed limit shall be charged / borne in accordance with the Regulations prevailing from time to time. The mutual fund would update the current expense ratios on its website (www.axismf.com) atleast three working days prior to the effective date of the change. <p>Investment strategy</p>	<p>The Scheme aims to generate long term capital appreciation by investing in a diversified portfolio of equity & equity related instruments across market capitalization.</p> <p>The scheme will target undervalued companies that offer opportunities to generate superior capital gains from a medium-to-long term perspective.</p> <p>An indicative set of companies which can offer such potential include – companies whose growth potential is not fully priced by the market, quality companies that are going through near term challenges but with strong long term potential, companies trading at a steep discount to their fair value.</p> <p>The portfolio will be built utilising a bottom-up stock selection process, focusing on appreciation potential of individual stocks from a fundamental perspective. The AMC employs a "Fair value" based research process to analyse the appreciation potential of each stock in its universe (Fair value is a measure of the intrinsic worth of a company). The universe of stocks is carefully selected to include companies having robust business models and enjoying sustainable competitive advantages as compared to their competitors.</p> <p>The scheme by utilising a holistic risk management strategy will endeavour to manage risks associated with investing in equity markets. The scheme has identified the following risks and designed risk management strategies, which are embedded in the investment process to manage these risks</p> <ol style="list-style-type: none"> Quality Risk: Risk of investing in unsustainable / weak companies. Price Risk: Risk of overpaying for a company. Liquidity Risk: High Impact cost of entry and exit. Concentration risk: Invest across the market capitalization spectrum and industries/ sectors. 	<p>The scheme has a dual objective of generating capital appreciation by investing in equity and equity related securities as well generating income by investing in debt and money market securities, while attempting to manage risk from the market through active asset allocation. In order to achieve this process, the scheme will follow a top-down and bottom-up strategy. The top-down process will lead to the active ongoing asset allocation decision between equity and debt and the bottom-up process would lead to construction of the portfolio using specific securities.</p> <p>The AMC has built a proprietary in-house quantitative model to determine the top-down dynamic asset allocation for the fund. The AMC has built a proprietary in-house quantitative approach to guide the asset allocation decision. The quantitative approach looks at equity markets across three parameters - momentum, volatility and valuations - to decide the appropriate allocation to the same. The allocation to debt is the residual number that is arrived at after deciding the equity allocation. The asset allocation decision is reviewed on an ongoing basis and is dynamically linked to movements in market variables.</p> <p>Explanation of the dynamic asset allocation process</p> <p>The AMC has built a proprietary in-house quantitative approach for dynamic asset allocation. For example to achieve a 50% net exposure, the scheme can run a 70% exposure in gross equity while maintaining a 20% hedge. The extent of hedging and the instrument to be used is based on market conditions and cost of the hedge.</p> <p>Senario 2:</p> <p>Assuming, Volatility is "Hi", Trend is "Hi" and Trailing PE of Nifty 50 Index is in the range of 15-18, then as per our quantitative model (matrix given above), the net equity allocation comes out to be in the range of 75% - 100%.</p> <p>The higher net exposure can be achieved with a combination of gross exposure and hedges. For example to achieve a 75% net exposure, the scheme can run a 80% exposure in gross equity while maintaining a 5% hedge. Alternatively, the same can be achieved by maintaining 75% gross exposure and not having any hedges. The extent of hedging and the instrument to be used is based on market conditions and cost of the hedge.</p> <p>Equity and Equity Related Instruments:</p> <p>The equity allocation will be based on the outcome of the allocation model given above. Once, the allocation is fixed, then the focus would be to build a diversified portfolio of strong growth companies, reflecting our most attractive investment ideas, at all points of time. The portfolio will be built utilizing a bottom-up stock selection process, focusing on appreciation potential of individual stocks from a fundamental perspective. The AMC employs a "Fair value" based research process to analyse the appreciation potential of each stock in its universe (Fair value is a measure of the intrinsic worth of a company). Investment strategy (Contd.)		<p>particular yield curve (e.g. the different points of the sovereign yield curve) while making investment decisions.</p> <p>Equity Derivatives: The gross equity exposure will be maintained between 65% - 100% while the net equity exposure is to be maintained between 30% - 100%. The difference between these exposure will be carried out using derivatives and fixed income securities including money market instruments will be in the range of 0% - 35%. The scheme will vary its investment in equity and equity related instruments depending upon the quantitative model.</p> <p>Cash-Futures Arbitrage: The fund would look for market opportunities between the spot and the futures market. The cash futures arbitrage strategy can be employed when the price of the futures exceeds the price of the underlying stock. The fund would first buy the stocks in cash market and then sell in the futures market to lock the spread known as arbitrage return. Buying the stock in cash market and selling the futures results into a hedge where the fund have locked in a spread and is not affected by the price movement of cash market and futures market. The arbitrage position can be continued till expiry of the future contracts. The future contracts are settled based on the last half an hour weighted average trade of the cash market. Thus there is a convergence between the cash market and the futures market on expiry. This convergence helps the fund to generate the arbitrage return locked in earlier. However, the position could even be closed earlier in case the price differential is realized before expiry or better opportunities are available in other stocks.</p>																																				
Risk profile of the scheme	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific risk factors are summarized below:</p> <p>The scheme carries risks associated with investing in equity and equity related securities, derivatives, debt and money market securities, securitized debt, short selling and securities lending.</p> <p>No assurance can be given that the Fund Manager will be able to locate investment opportunities or to correctly exploit price discrepancies in the capital markets. Reduction in mispricing opportunities between the cash market and Future and Options market may lead to lower level of activity affecting the returns.</p> <p>In case of a large redemption, the scheme may need to reverse the spot-futures transaction before the date of futures' settlement. This eventuality may lead to basis risk.</p> <p>Investment in mutual fund units involves investment risks such as trading volumes, settlement risk, liquidity risk and default risk.</p> <p>Trading volume may restrict liquidity. The AMC may choose to invest in unlisted securities which may increase the risk on the portfolio.</p> <p>Also, the value of the Scheme investments may be affected by currency exchange rates, changes in law/policies of the government, taxation laws and political, economic or other developments.</p> <p>Investments in debt and money market instruments are subject to interest rate risk, re-investment risk, basis risk, credit risk, spread risk, prepayment risk, etc.</p>	<p>The scheme attempts to manage risk through active asset allocation. According to detailed historical analysis done by the AMC, such a scheme is able to generate a much lower risk profile compared to a 100% equity investment strategy. However there is no certainty that the active asset allocation approach will be able to deliver the risk management going forward. Please refer to the SID for further details.</p>

Investment strategy	<p>The scheme aims to generate long term capital appreciation along with current income by investing in a mix of Equity and Equity related securities, debt securities and money market instruments.</p> <p>Fixed Income Instruments: The scheme proposes to invest in a diversified portfolio of debt & money market instruments to generate income.</p> <p>The portfolio duration and credit exposures will be decided based on a thorough research of the general macroeconomic condition, political and fiscal environment, systematic liquidity, inflationary expectations, corporate performance and other economic considerations. The fund manager will keep in mind the yield structure of different asset classes as well as the kinks within a particular yield curve while making investment decisions.</p> <p>Equity and Equity Related Instruments: The equity allocation will be managed actively. The focus would be to build a diversified portfolio of strong growth companies, reflecting our most attractive investment ideas, at all points of time. The portfolio will be built utilizing a bottom-up stock selection process, focusing on appreciation potential of individual stocks from a fundamental perspective. The AMC employs a "Fair value" based research process to analyze the appreciation potential of each stock in its universe (Fair value is a measure of the intrinsic worth of a company). The universe of stocks is carefully selected to include companies having a robust business models and enjoying sustainable competitive advantages as compared to their competitors. The scheme by utilizing a holistic risk management strategy will endeavor to manage risks associated with investing in equity markets. The scheme has identified the following risks and designed risk management strategies, which are embedded in the investment process to manage these risks:</p> <ol style="list-style-type: none"> Quality Risk - Risk of investing in unsustainable / weak companies. Price Risk - Risk of overpaying for a company Liquidity Risk - High Impact cost of entry and exit Concentration risk - Invest across the market capitalization spectrum and industries/ sectors Volatility Risk - Volatility in price due to company or portfolio specific factors Event Risk - Price risk due to a company / sector specific or market event <p>Cash-Futures Arbitrage:</p> <p>The Scheme would look for market opportunities between the spot and the futures market. The cash-futures arbitrage strategy can be employed when the price of the futures exceeds the price of the underlying stock. The Scheme would first buy the stocks in cash market and then sell in the futures market to lock the spread known as arbitrage return. Buying the stock in cash market and selling the futures results into a hedge where the Scheme have locked in a spread and is not affected by the price movement of cash market and futures market. The arbitrage position can be continued till expiry of the future contracts. The future contracts are settled based on the last half an hour's weighted average trade of the cash market. Thus there is a convergence between the cash market and the futures market on expiry. This convergence helps the fund to generate the arbitrage return locked in earlier. However, the position could even be closed earlier in case the price differential is realized before expiry or better opportunities are available in other stocks. The strategy is attractive if this price differential (post all costs) is higher than the investor's cost-of capital. The Scheme may also enter into reverse arbitrage strategies, i.e., if futures were quoting at a discount, futures would be bought and shares would be sold to lock in an arbitrage profit.</p>	<p>The Scheme aims to generate long term capital appreciation by investing in a diversified portfolio of Equity & Equity Related Instruments both in India as well as overseas.</p> <p>Equity portfolio will be run as a diversified portfolio without any capitalization bias and sector preference with a balanced mix of large and mid cap stocks.</p> <p>The Scheme will look at the 3 pillars while constructing the portfolio:</p> <ul style="list-style-type: none"> High quality portfolio Sustainable growth across market cycles Low churn <p>Portfolio construction would be a combination of both top down and bottom up approach. The top down approach will be based on macro-economic analysis and will be used to arrive at the geographical market and sectors/themes while the bottom-up process will focus on appreciation potential of individual stocks from a fundamental perspective to arrive at the stock selection. The AMC employs a "Fair value" based research process to analyse the appreciation potential of each stock in its universe (Fair value is a measure of the intrinsic worth of a company). The universe of stocks is carefully selected to include companies having a robust business models and enjoying sustainable competitive advantages as compared to their competitors.</p> <p>Investment in foreign securities will be made to capture potential opportunities in equity markets of developed and/or emerging markets across geographies. Investment could also be made in themes/brands/market leaders present in these specific markets that cannot be played through the domestic economy either because these are not present or the companies are not listed on an exchange in India.</p> <p>The portfolio will have an absolute return focus. That is the fund manager will not look at the market cycles but will try to generate returns while minimizing the potential for downside. Thus the Scheme will have the leeway to take a higher allocation to cash in case the fund manager is not able to find appropriate stocks at acceptable valuations at any time.</p> <p>The Scheme by utilising a holistic risk management strategy will endeavour to manage risks associated with investing in equity markets. The Scheme has identified the following risks and designed risk management strategies, which are embedded in the investment process to manage these risks</p> <ol style="list-style-type: none"> Quality Risk - Risk of investing in unsustainable / weak companies. Price Risk - Risk of overpaying for a company Liquidity Risk - High Impact cost of entry and exit Volatility Risk - Volatility in price due to company or portfolio specific factors Event Risk - Price risk due to a company / sector specific or market event
Risk profile of the scheme	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific risk factors are summarized below:</p> <p>The scheme carries risks associated with investing in equity and equity related securities, derivatives, debt and money market securities, securitized debt, short selling and securities lending.</p> <p>No assurance can be given that the Fund Manager will be able to locate investment opportunities or to correctly exploit price discrepancies in the capital markets. Reduction in mispricing opportunities between the cash market and Future and Options market may lead to lower level of activity affecting the returns.</p> <p>In case of a large redemption, the scheme may need to reverse the spot-futures transaction before the date of futures' settlement. This eventuality may lead to basis risk.</p> <p>Investment in mutual fund units involves investment risks such as trading volumes, settlement risk, liquidity risk and default risk. Trading volume may restrict liquidity. The AMC may choose to invest in unlisted securities which may increase the risk on the portfolio. Also, the value of the Scheme investments may be affected by currency exchange rates, changes in law/policies of the government, taxation laws and political, economic or other developments.</p> <p>Investments in debt and money market instruments are subject to interest rate risk, re-investment risk, basis risk, credit risk, spread risk, prepayment risk, etc.</p>	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific risk factors are summarized below:</p> <p>The scheme carries risks associated with investing in equity and equity related securities, derivatives, debt and money market securities, securitized debt, short selling and securities lending, foreign security/overseas investment/offshore securities, Repo in Corporate Debt.</p> <p>The value of Scheme's investments may be affected by factors affecting the Securities markets and price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in law/policies if the Government, taxation laws and political, economic or other developments which may have an adverse bearing on individual securities, a specific sector or all sectors. Consequently, the NAV of the units of the Scheme may be affected. Investment in Foreign Securities involves a currency risk. To the extent that the assets of the Scheme will be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by changes in the value of certain foreign currencies relative to the Indian Rupee. The repatriation of capital to India may also be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of other restrictions on investment.</p>
Risk management strategies	The Scheme also relies on its own research as well as third party research. This involves one-to-one meetings with the managements, attending conferences and analyst meets and also tele-conferences. The analysis will focus, amongst others, on the predictability and strength of cash flows, value of assets, capital structure, business prospects, policy environment, strength of management, responsiveness to business conditions, etc.	Risk management is going to be an integral part of the investment process. Effective risk management is critical to fund management for achieving financial soundness. Investments by the Scheme shall be made as per the investment objectives of the Scheme and provisions of the Regulations.

Differentiation with existing open ended equity schemes (as on April 30, 2019)	For comparison of Existing Schemes, Investment Objective, Asset Under Management (AUM) and number of folios, please refer to point no. 7A on page 25 to 27.									
Investment strategy	<p>The scheme intends to generate long term capital appreciation from a diversified portfolio of predominantly equity & equity related instruments of small cap companies. Small cap companies of today are likely to become the large caps in future. They are usually in growing industries with nimble operations, which can adapt swiftly to changing market conditions & seize opportunities. The portfolio will be built utilising a bottom-up stock selection process, focusing on appreciation potential of individual stocks from a fundamental perspective. The AMC employs a "Fair value" based research process to analyse the appreciation potential of each stock in its universe (Fair value is a measure of the intrinsic worth of a company). The universe of stocks is carefully selected to include companies having a robust business models and enjoying sustainable competitive advantages as compared to their competitors. The Fund will, mainly, invest in small-cap companies. Small-cap companies, as they are in a stage of growth, may not be valued at their fair price. However, the Fund intends to identify such strong growth companies & take advantage of their future appreciation. The scheme by utilising a holistic risk management strategy will endeavour to manage risks associated with investing in equity markets. The scheme has identified the following risks and designed risk management strategies, which are embedded in the investment process to manage these risks</p> <ol style="list-style-type: none"> Quality Risk - Risk of investing in unsustainable / weak companies. Price Risk - Risk of overpaying for a company Liquidity Risk - High Impact cost of entry and exit Volatility Risk - Volatility in price due to company or portfolio specific factors Event Risk - Price risk due to a company / sector specific or market event 									
Risk profile of the scheme	<p>Mutual Fund units involve investment risks including the possible loss of principal. Scheme specific Risk Factors are summarized below: Small cap stocks are more volatile & less liquid than large cap companies. Investors therefore should assume that illiquidity risks are higher in this fund than in a normally diversified equity fund. Thus, relative to larger, more liquid stocks, investing in small cap stocks, involves potentially greater volatility and risk. The scheme carries risks associated with investing in equity and equity related securities, derivatives, foreign securities, debt securities, securitized debt, money market instruments, short selling and securities lending, repo transaction in Corporate Bond. Investment in Mutual Fund units involves investment risks such as trading volumes, settlement risk, liquidity risk and default risk. Trading volume may restrict liquidity in equity and debt investments. The AMC may choose to invest in unlisted securities which may increase the risk on the portfolio. Also, the value of the Scheme investments may be affected by interest rates, currency exchange rates, changes in law/policies of the government, taxation laws and political, economic or other developments. Investments in debt and money market instruments are subject to interest rate risk, reinvestment risk, basis risk, credit risk, spread risk, prepayment risk, etc. to the extent of the Scheme's investments in such securities. Please refer to the SID for further details.</p>									
Risk management strategies	The Fund, by utilizing a holistic risk management strategy, will endeavor to manage risks associated with investing in equity markets. The risk control process involves identifying & measuring the risk through various risk measurement tools. The Fund has identified following risks of investing in equities and designed risk management strategies, which are embedded in the investment process to manage such risks.

6. Unit holder's information	<p>Account Statements: On acceptance of the application for subscription, an allotment confirmation specifying the number of units allotted by way of email and/or SMS within 5 business days from the date of receipt of transaction request/ allotment will be sent to the unit holders registered e-mail address and/or mobile number.</p> <p>Consolidated Account Statement: CAS is an account statement detailing all the transactions and holding at the end of the month including transaction charges paid to the distributor, across all schemes of all mutual funds. CAS issued to investors shall also provide the total purchase value/cost of investment in each scheme.</p> <p>Further, CAS issued for the half-year (September/ March) shall also provide</p> <ol style="list-style-type: none"> The amount of actual commission paid by AMC/Mutual Fund to distributors (in absolute terms) during the half-year period against the concerned investor's total investments in each scheme. The scheme's average Total Expense Ratio (in percentage terms) along with the break up between Investment and Advisory fees, Commission paid to the distributor and Other expenses for the period for each scheme's applicable plan (regular or direct or both) where the concerned investor has actually invested in. <p>a) For Unitholders not holding Demat Account: CAS for each calendar month shall be issued, on or before tenth day of succeeding month by the AMC. The AMC shall ensure that a CAS for every half yearly (September/ March) is issued, on or before tenth day of succeeding month, detailing holding at the end of the six month, across all schemes of all mutual funds, to all such investors in whose folios no transaction has taken place during that period. The AMC shall identify common investors across fund houses by their Permanent Account Number(PAN) for the purposes of sending CAS. In the event the account has more than one registered holder, the first named Unit Holder shall receive the Account Statement. The AMC will send statement of accounts by e-mail where the Investor has provided the e-mail id. Additionally, the AMC may at its discretion send Account Statements individually to the investors.</p> <p>b) For Unitholders holding Demat Account: SEBI vide its Circular no. CIR /MRD /DP /31/2014 dated November 12, 2014, in order to enable a single consolidated view of all the investments of an investor in Mutual Fund and securities held in demat form with Depositories, has required Depositories to generate and dispatch a single CAS for investors having mutual fund investments and holding demat accounts. In view of the aforesaid requirement, for investors who hold demat account, for transactions in the schemes of Axis Mutual Fund on or after February 1, 2015, a CAS, based on PAN of the holders, will be sent by Depositories to Investors holding demat account for each calendar month within 10th day of the succeeding month to the investors in whose folios transactions have taken place during that month. CAS will be sent by Depositories every half yearly (September/March), on or before 10th day of succeeding month, detailing holding at the end of the six month, to all such investors in whose folios and demat accounts there have been no transactions during that period. CAS sent by Depositories is a statement containing details relating to all financial transactions made by an investor across all mutual funds viz. purchase, redemption, switch, dividend payout, dividend reinvestment, systematic investment plan, systematic withdrawal plan, systematic transfer plan (including transaction charges paid to the distributor) and transaction in dematerialized securities across demat accounts of the investors and holding at the end of the month. In case of demat accounts with nil balance and no transactions in securities and in mutual fund folios, the depository shall send account statement in terms of regulations applicable to the depositories. Investors whose folio(s)/ demat account(s) are not updated with PAN shall not receive CAS. Consolidation of account statement is done on the basis of PAN. Investors are therefore requested to ensure that their folio(s)/ demat account(s) are updated with PAN. In case of multiple holding, it shall be PAN of the first holder and pattern of holding. For Unit Holders who have provided an e-mail address to the Mutual Fund or in KYC records, the CAS is sent by e-mail. However, where an investor does not wish to receive CAS through email, option is given to the investor to receive the CAS in physical form at the address registered in the Depository system. Investors who do not wish to receive CAS sent by depositories have an option to indicate their negative consent. Such investors may contact the depositories to opt out. Investors who do not hold demat account continue to receive CAS sent by RTA/AMC, based on the PAN, covering transactions across all mutual funds as per the current practice. In case an investor has multiple accounts across two depositories; the depository with whom the account has been opened earlier will be the default depository. The dispatches of CAS by the depositories constitute compliance by the AMC/ the Fund with the requirement under Regulation 36(4) of SEBI (Mutual Funds) Regulations. However, the AMC reserves the right to furnish the account statement in addition to the CAS, if deemed fit in the interest of investor(s). Investors whose folio(s)/ demat account(s) are not updated with PAN shall not receive CAS. Investors are therefore requested to ensure that their folio(s)/ demat account(s) are updated with PAN. For folios not included in the CAS (due to non-availability of PAN), the AMC shall issue monthly account statement to such Unit holder(s), for any financial transaction undertaken during the month on or before 10th of succeeding month by mail or email. For folios not eligible to receive CAS (due to non-availability of PAN), the AMC shall issue an account statement detailing holding across all schemes at the end of every six months (i.e. September/March), on or before 10th day of succeeding month, to all such Unit holders in whose folios no transaction has taken place during that period shall be sent by mail/e-mail.</p> <p>Annual Report: The Scheme wise annual report or an abridged summary thereof shall be mailed (emailed, where e mail id is provided unless otherwise required) to all Unit holders not later than four months (or such other period as may be specified by SEBI from time to time) from the date of closure of the relevant accounting year (i.e. 31st March each year) and full annual report shall be available for inspection at the Head Office of the Mutual Fund and a copy shall be made available to the Unit holders on request on payment of nominal fees, if any. Scheme wise annual report shall also be displayed on the website of the Mutual Fund (www.axismf.com) and on the website of Association of Mutual Funds in India (www.amfiindia.com). Unitholders whose email addresses are not registered with the Mutual Fund may 'opt-in' to receive a physical copy of the annual report or an abridged summary thereof. Further, AMC shall provide a physical copy of the abridged summary of the Annual Report, without charging any cost, on a specific request received from a unitholder. AMC shall also publish an advertisement every year, in an all India edition of one national English daily newspaper and in one Hindi newspaper, disclosing the hosting of the scheme wise annual report on the website of the Mutual Fund and AMFI and the modes through which a unitholder can submit a request for a physical or electronic copy of the annual report or abridged summary thereof..</p> <p>Monthly / Half yearly disclosures The AMC will disclose the portfolio of the Scheme (alongwith ISIN) as on the last day of the month / half year on the website of the Mutual Fund and AMFI within 10 days from the close of each month/ half year (i.e. 31st March and 30th September) respectively in a user-friendly and downloadable spreadsheet format. Further, AMC shall publish an advertisement in an all India edition of one national English daily newspaper and one Hindi newspaper, every half year, disclosing the hosting of the half-yearly statement of its schemes' portfolio on the website of the Mutual Fund and AMFI and the modes through which unitholder(s) can submit a request for a physical or electronic copy of the statement of scheme portfolio. The AMC will also provide a dashboard, in a comparable, downloadable (spreadsheet) and machine readable format, providing performance and key disclosures like Scheme's AUM, investment objective, expense ratios, portfolio details, scheme's past performance etc. on website.</p>														
7A. Differentiation with existing open ended equity schemes (as on April 30, 2019)	<p>The Scheme is not a minor modification of any existing scheme/ product of Axis Mutual Fund. Differentiation is as follows:</p> <p>Axis Long Term Equity Fund Asset Allocation</p> <table border="1" data-bbox="256 1451 1517 1520"> <thead> <tr> <th>Type of Instrument</th> <th>Normal Allocation (% of net assets)</th> </tr> </thead> <tbody> <tr> <td>Equity and equity-related Securities</td> <td>80 - 100</td> </tr> <tr> <td>Debt and money market instruments</td> <td>0 - 20</td> </tr> </tbody> </table> <p>Primary Investment Objective - The investment objective of the Scheme is to generate income and long-term capital appreciation from a diversified portfolio of predominantly equity and equity-related Securities. However, there can be no assurance that the investment objective of the Scheme will be achieved. Investment Strategy - The Scheme will invest in a diversified portfolio of strong growth companies with sustainable business models. Though the benchmark is S&P BSE-200, the investments will not be limited to the companies constituting the benchmark. The portfolio will be built utilising a bottom-up stock selection process, focusing on appreciation potential of individual stocks from a fundamental perspective. The AMC employs a fundamentals based research process to analyse the appreciation potential of each stock in its universe. The universe of stocks is carefully selected to include companies having robust business models and enjoying sustainable competitive advantages as compared to their competitors. The Fund will have the flexibility to invest across the market capitalization spectrum. The Scheme will endeavour to remain fully invested in equity and equity-related instruments at all times. Differentiation - An open ended equity linked saving scheme with a statutory lock in of 3 year and tax benefit AUM (₹ in crores): 19,104.24; No. of Folios: 1,679,320</p> <p>Axis Midcap Fund Asset Allocation</p> <table border="1" data-bbox="256 1801 1517 1892"> <thead> <tr> <th>Type of Instrument</th> <th>Normal Allocation (% of net assets)</th> </tr> </thead> <tbody> <tr> <td>Equity and Equity Related Instruments of Mid-cap companies</td> <td>65 - 100</td> </tr> <tr> <td>Equity and Equity Related Instruments of non Mid-cap Companies</td> <td>0 - 35</td> </tr> <tr> <td>Debt and Money Market Instruments</td> <td>0 - 35</td> </tr> </tbody> </table> <p>Primary Investment Objective - To achieve long term capital appreciation by investing predominantly in equity & equity related instruments of Mid Cap companies. Investment Strategy - Axis Midcap Fund endeavors to generate capital appreciation through an actively managed diversified portfolio of primarily larger mid-cap companies. The portfolio will be built utilising a bottom-up stock selection process, focusing on appreciation potential of individual stocks from a fundamental perspective. The AMC employs a "Fair value" based research process to analyse the appreciation potential of each stock in its universe (Fair value is a measure of the intrinsic worth of a company). 7A. Differentiation with existing open ended equity schemes (as on April 30, 2019) (Contd.)

The Fund will, mainly, invest in mid-cap companies. Mid-cap companies, as they are in a stage of growth, may be valued higher than their fair value. However, the Fund intends to identify such strong growth companies & take advantage of their future appreciation.

The Fund by utilising a holistic risk management strategy will endeavour to manage risks associated with investing in equity markets. The Fund has identified the following risks and designed risk management strategies, which are embedded in the investment process to manage these risks-

- i. Quality Risk - Risk of investing in unsustainable / weak companies.
- ii. Price Risk - Risk of overpaying for a company
- iii. Liquidity Risk - High Impact cost of entry and exit
- iv. Volatility Risk - Volatility in price due to company or portfolio specific factors
- v. Event Risk - Price risk due to a company / sector specific or market event

Differentiation - An open ended equity scheme predominantly investing in Mid Cap companies

Investment Strategy - The scheme aims to generate long term capital appreciation by investing in a concentrated portfolio of equity & equity related instruments of up to 25 companies.

In order to have a concentrated portfolio, the scheme will follow a bottom up stock selection approach.

The portfolio will be built utilising a bottom-up stock selection process, focusing on appreciation potential of individual stocks from a fundamental perspective. The AMC employs a "Fair value" based research process to analyse the appreciation potential of each stock in its universe (Fair value is a measure of the intrinsic worth of a company).

The universe of stocks is carefully selected to include companies having a robust business models and enjoying sustainable competitive advantages as compared to their competitors.

While 65 - 100% of the corpus will be invested in equities (no less than 20 companies and up to 25 companies), it is expected that under normal market conditions at least 80% of the corpus will be invested in equities (no less than 20 companies and up to 25 companies). The Scheme will primarily invest in companies among the top 200 in terms of market cap.

7A. Differentiation with existing open ended equity schemes (as on April 30, 2019) (Contd.)

Investment Strategy - Equity portfolio will be run as a diversified portfolio with a balanced mix of large and mid cap stocks.

The Scheme will look at the 3 pillars while constructing the portfolio:

- High quality portfolio
- Sustainable growth across market cycles
- Low churn

Portfolio construction would be a combination of both top down and bottom up approach. The top down approach will be based on macro-economic analysis and will be used to arrive at the geographical market and sectors/themes while the bottom-up process will focus on appreciation potential of individual stocks from a fundamental perspective to arrive at the stock selection. The AMC employs a "Fair value" based research process to analyse the appreciation potential of each stock in its universe (Fair value is a measure of the intrinsic worth of a company). The universe of stocks is carefully selected to include companies having a robust business models and enjoying sustainable competitive advantages as compared to their competitors.

Investment in Foreign Securities will be made to capture potential opportunities in equity markets of developed and/or emerging markets across geographies. Investment could also be made in themes/brands/market leaders present in these specific markets that cannot be played through the domestic economy either because these are not present or the companies are not listed on an exchange in India.

The portfolio will have an absolute return focus. That is the fund manager will not look at the market cycles but will try to generate returns while minimizing the potential for downside. Thus the Scheme will have the leeway to take a higher allocation to cash in case the fund manager is not able to find appropriate stocks at acceptable valuations at any time.

The Scheme by utilising a holistic risk management strategy will endeavour to manage risks associated with investing in equity markets. The Scheme has identified the following risks and designed risk management strategies, which are embedded in the investment process to manage these risks

- i. Quality Risk - Risk of investing in unsustainable / weak companies.

7B. Differentiation with existing open ended hybrid schemes (as on April 30, 2019)

The Scheme is not a minor modification of any existing scheme/ product of Axis Mutual Fund. Differentiation is as follows:

Axis Dynamic Equity Fund

Asset Allocation

Type of Instrument	Normal Allocation (% of net assets)
Equity and Equity related securities	65 - 100
Equity Derivatives	0 - 45
Debt & Money Market Instruments including cash & cash equivalent	0 - 35
Units issued by REITs & InvITs	0 - 10

Primary Investment Objective - To generate capital appreciation by investing in a portfolio of equity or equity linked securities while secondary objective is to generate income through investments in debt and money market instruments. It also aims to manage risk through active asset allocation. However, there is no assurance or guarantee that the investment objective of the Scheme will be achieved. The Scheme does not assure or guarantee any returns.

Investment Strategy - The scheme has a dual objective of generating capital appreciation by investing in equity and equity related securities as well as generating income by investing in debt and money market securities, while attempting to manage risk from the market through active asset allocation. In order to achieve this process, the scheme will follow a top-down and bottom-up strategy. The top-down process will lead to the active ongoing asset allocation decision between equity and debt and the bottom up process would lead to construction of the portfolio using specific securities.

The AMC has built a proprietary in-house quantitative model to determine the top-down dynamic asset allocation for the fund. The AMC has built a proprietary in-house quantitative approach to guide the asset allocation decision. The quantitative approach looks at equity markets across three parameters – momentum, volatility and valuations – to decide the appropriate allocation to the same. The allocation to debt is the residual number that is arrived at after deciding the equity allocation. The asset allocation decision is reviewed on an ongoing basis and is dynamically linked to movements in market variables.

Equities, equity related instruments and derivatives including index futures, stock futures, index options, & stock options, etc. as part of hedged / arbitrage exposure	65 - 90
Debt and Money market instruments (including investments in securitized debt)	10 - 35

Primary Investment Objective - To generate income through low volatility absolute return strategies that take advantage of opportunities in the cash and the derivative segments of the equity markets including the arbitrage opportunities available within the derivative segment, by using other derivative based strategies and by investing the balance in debt and money market instruments. However, there is no assurance or guarantee that the investment objective of the Scheme will be achieved. The Scheme does not assure or guarantee any returns.

Investment Strategy - The Scheme will seek to achieve its investment objective primarily by employing various strategies which seek to exploit absolute returns opportunities in equity and derivative markets. In case such opportunities are not available, the scheme will invest the corpus in debt and money market instruments.

The equity and derivative markets have experienced enormous growth in India in the last few years. The market provides the investor the ability to derive returns from the various strategies enumerated below. The market is not always efficient to the extent of mispricing in the derivative market and the underlying cash market. These techniques differ in that each method attempts to exploit a different form of imperfection in the underlying equity, debt and derivatives market and thus expose the investor to different forms of risk.

The strategies the Fund may adopt could be as under. The list is not exhaustive and the Fund could use similar strategies and any other strategies as available in the markets.

- Liquidity Risk - High Impact cost of entry and exit
- Volatility Risk - Volatility in price due to company or portfolio specific factors
- Event Risk - Price risk due to a company / sector specific or market event.

Fixed Income: The Scheme proposes to invest in a diversified portfolio of high quality debt and money market instruments to generate regular income. The fund manager will allocate the assets of the scheme taking into consideration the prevailing interest rate scenario & the liquidity of the different instruments.

The portfolio duration and credit exposures will be decided based on a thorough research of the general macroeconomic condition, political and fiscal environment, systemic liquidity, inflationary expectations, corporate performance and other economic considerations. The fund manager will keep in mind the yield structure of different asset classes (e.g. the sovereign yield curve and the corporate bond yield curve) as well as the kinks within a particular yield curve (e.g. the different points of the sovereign yield curve) while making investment decisions.

Gold Exchange Traded Funds: The Scheme will also invest in gold ETFs as gold, historically, has shown a low correlation with other asset classes like equity and debt making it a good asset for diversifying the overall portfolio.

Option to register multiple bank accounts

The AMC / Mutual Fund has also provided a facility to investors to register multiple bank accounts. By registering multiple bank accounts, investors can use any of their registered bank accounts to receive redemption / dividend proceeds. Any request for a change in bank mandate requires 10 days for validation and verification. Further, these account details will be used by the AMC / Mutual Fund / R&T for verification of instruments (like cheques/DDs/POs) received at the time of subscription / purchase applications to ensure that subscription payments are received only from one of the registered bank accounts. Payments from non-registered bank accounts (called third party payments) will not be accepted (except where permitted as per SEBI regulations). Investors are requested to avail of this facility by filling in the application form for registration of multiple bank accounts available at any of our ISCs / OPAs or on our website www.axismf.com.

Cheques submitted at the time of purchase should be from the beneficiary investors account or from an account mentioned in your Multiple Bank Accounts Registration form (except for minors for amounts less than ₹ 50,000 and Corporates / non-individuals).

Demand drafts submitted at the time of subscription should be accompanied by a banker's certificate clearly stating the investor's name and PAN as well as

mentioning that the demand draft has been issued by debiting the investor's own bank account. Pre-funded instruments issued by the bank against cash shall not be accepted for investments of ₹ 50,000 or more. This pre-funded instrument should also be accompanied by a certificate from the banker giving the investor's name, address and PAN.

Payments made through RTGS/NEFT/NECS should be accompanied by a banker's certificate stating that the RTGS/NEFT/NECS payment has been made by debiting the investor's own bank account along with mention of the investor's name and PAN.

7. THIRD PARTY PAYMENTS

When payment is made through instruments issued from a bank account other than that of the investor, the same is referred to as a Third Party payment. Where an investor has opted to register multiple bank accounts (using the 'Multiple Bank Accounts Registration Form'), and purchase payment is made from an account different from what is registered, any one of the following documents need to be provided as proof along with the payment instrument.

- Banker's certificate stating that the investment is from the investor's own bank account along with mention of his name and PAN
 - Bank account passbook or statement mentioning the investor's name / PAN
- Restriction on acceptance of Third Party payments for subscriptions, and exceptions thereto

- In case of payments from a joint bank account, one of the joint holders of the bank account must be the first account holder under the investment application.
- The Asset Management Company shall not accept subscriptions with Third Party payments except in the following situations:

- Where payment is made by parents/grand parents/related persons on behalf of a minor in consideration of natural love and affection or as gift for a value not exceeding ₹ 50,000 (each regular purchase or per SIP installment). However this restriction will not be applicable for payment made by a guardian whose name is registered in the records of Mutual Fund in that folio.
- Where payment is made by an employer on behalf of an employee under Systematic Investment Plans through payroll deductions.
- Custodian on behalf of an FII or a client.

Documents to be submitted for exceptional cases

- KYC is mandatory for all investors (guardian in case of minor) and the person making the payment i.e. the third party. Investors and the person making the payment should attach their valid KYC acknowledgement letter to the application form.
- Submission of a separate, complete and valid 'Third Party Payment Declaration Form' from the investors (guardian in case of minor) and the person making the payment i.e. third party. The said Declaration Form shall, inter-alia, contain the details of the bank account from which the payment is made and the relationship with the investor(s). Please contact the nearest OPA/ISC of Axis Mutual Fund or visit our website www.axismf.com for the declaration form.

8. KYC

All Applicants (including POAs and Guardians) are required to be KYC compliant irrespective of the amount of investment. In case you are not KYC certified, please fill in the KYC form (individual or Non-Individual). A KYC acknowledgement letter should be submitted along with application for opening a folio or making an investment. Each holder in the folio must be KYC compliant.

Investors may kindly note that new SEBI Circular issued regarding uniformity in the KYC process was effective from January 1, 2012.

- SEBI has introduced a common KYC Application Form for all the SEBI registered intermediaries, new Investors are therefore requested to use the common KYC Application Form and carry out the KYC process including In-Person Verification (IPV) with any SEBI registered intermediaries including mutual funds. The KYC Application Forms are available on our website www.axismf.com.
- The Mutual Fund shall perform the initial KYC of its new investors and shall also accept the details change form for investors who have done their KYC prior to 31st Dec11.
- It is mandatory to carry out In-Person Verification(IPV) for processing the KYC of its new / existing investors from January 1, 2012.
- Once the KYC and IPV-In Person Verification has been done with any SEBI registered intermediary, the investor need not undergo the same process again with any another intermediary including mutual funds. However, the Mutual Fund reserves the right to carry out fresh KYC/additional KYC of the investor.
- Existing KYC compliant investors of the Mutual Fund can continue to invest as per the current practice.
- Non-individual investors will have to do a fresh KYC due to significant changes in KYC requirements.
- In accordance with SEBI Circular No. CIR/MIRSD/13/2013 dated December 26, 2013, the additional details viz. Occupation details, Gross Annual Income/networth and Politically Exposed Person (PEP) * status mentioned under section 2 & 3 which was forming part of uniform KYC form will now be captured in the application form of the Fund. Also, the detail of nature of services viz. Foreign Exchange/Gaming/Money Lending, etc.,(applicable for first/sole applicant) is required to be provided as part of Client Due Diligence (CDD) Process of the Fund.

The said details are mandatory for both Individual and Non Individual applicants.

*PEP are defined as individuals who are or have been entrusted with prominent public functions in a foreign country, e.g., Heads of States or of Governments, senior politicians, senior Government/judicial/ military officers, senior executives of state owned corporations, important political party officials, etc.

Subsequently, SEBI, vide its circular no. MIRSD/Cir-5/2012 dated April 13, 2012 advised various intermediaries to upload KYC data of its existing customers into the KRA system. While uploading KYC data into the KRA system, intermediaries were also required to highlight such 'Missing/Not Available' KYC information of a customer, which was either not required or not taken previously, but was mandatory as per uniform KYC guidelines issued by SEBI.

In accordance with AMFI Best practices guidelines circular no. 62/2015-16 dated September 18, 2015, investors may note the following:

INSTRUCTIONS FOR COMPLETING THE APPLICATION FORM (Contd.)

Please read the SID carefully before signing the application form and tendering payment.

It is mandatory for all new/existing investors to provide additional KYC information such as Income details, Occupation, association with politically exposed person, net worth etc. as mentioned in the application form. Subscription requests, without providing these details, are liable to be rejected. No subscriptions (whether fresh or additional) and switches pertaining to 'KYC on-hold' cases are accepted, unless the investor / unitholder also submits relevant KYC missing / updated information, which is appropriately updated on the KRA - KYC.

Further, it is mandatory for existing customers to complete In-Person Verification process and provide the missing KYC information failing which their applications / transaction requests for additional subscription (including switches) is liable to be rejected.

8A Operationalisation of Central KYC Records Registry (CKYCR)

Central Registry of Securitisation and Asset Reconstruction and Security interest of India ('CERSAI') has been authorised by Government of India to act as Central KYC Records Registry under Prevention of Money-Laundering (Maintenance of Records) Rules, 2005 ('PMLA Rules').

SEBI vide its circular ref. no. CIR/MIRSD/66/2016 dated July 21, 2016 and circular ref. no. CIR/MIRSD/120/2016 dated November 10, 2016 has prescribed that the Mutual Fund/ AMC should capture KYC information for sharing with CKYCR as per the KYC template prescribed by CERSAI for uniform and smooth implementation of CKYC norms for onboarding of new investors in mutual funds.

In accordance with the aforesaid SEBI circulars and AMFI best practice guidelines for implementation of CKYC norms with effect from February 1, 2017:

- Individual investors who have never done KYC process under KRA regime i.e. a new investor who is new to KRA system and whose KYC is not registered or verified in the KRA system shall be required to provide KYC details in the CKYC Form to the Mutual Fund/ AMC.
- Individual investor who fills old KRA KYC Form, should provide additional / missing information using Supplementary KYC Form or fill CKYC Form.
- Details of investors shall be uploaded on the system of CKYCR and a 14 digit unique KYC identifier ('KIN') will be generated for such customer.
- New investors, who have completed CKYC process & have obtained KIN may quote their KIN in the application form instead of submitting CKYC Form/ Supplementary KYC Form.
- AMC/ Mutual Fund shall use the KIN of the investor to download the KYC information from CKYCR system and update its records.
- If the PAN of investor is not updated on CKYCR system, the investor should submit self-certified copy of PAN card to the Mutual Fund/ AMC.

The CKYC Form and Supplementary KYC Form are available at Investor Service Centre (ISC) of Axis Mutual Fund and on website www.axismf.com.

The AMC reserves the right to reject transaction application in case the investor(s) fails to submit information and/or documentation as mentioned above. In the event of non compliance of KYC requirements, the Trustee / AMC reserves the right to freeze the folio of the investor(s).

9. ULTIMATE BENEFICIAL OWNERS(S)

SEBI vide its circular no. CIR/MIRSD/2/2013 dated January 24, 2013 further read with AMFI Best practices guidelines circular no. 62/2015-16 dated September 18, 2015 and other applicable regulations and guidelines, for identification of Beneficial Ownership to be followed by the intermediaries for determination of beneficial owners. A 'Beneficial owner' is defined as a natural person or persons who ultimately own, control or influence a client and/or persons on whose behalf a transaction is being conducted and includes a person who exercises ultimate effective control over a legal person or arrangement. In this regard, all categories of investors (including all new / existing investors / unitholders) (except individuals, companies listed on a stock exchange or majority-owned subsidiary of such companies) are mandatorily required to provide beneficial ownership details for all investments. Failing which, fund reserves the right to reject applications / subscription requests / additional subscription requests (including switches) / restrict further investments or seek additional information from investors who have not provided the requisite information on beneficial ownership. In the event of change in beneficial ownership, investors are requested to immediately update the details with the Fund/Registrar.

- For any negligence/mistake or misconduct by the Investor/s.
- For any breach or non-compliance by the Investor/s of the rules/terms and conditions stated in the Scheme Information Document.
- For not verifying the identity of the person giving the telephone instructions in the Investor/s name.
- For not carrying out any such instructions where the AMC has reason to believe (which decision of the AMC the Investor/s shall not question or dispute) that the instructions given are not genuine or are otherwise improper, unclear, vague or cause for doubt.
- For carrying out a transaction after such reasonable verification as the AMC may deem fit regarding the identity of the Investor/s.
- In case of error in NAV communication.
- For accepting instructions given by any one of the Investor/s or his/her authorized person.
10. Axis Asset Management Company Limited (AMC) has the right to ask such information (Key Information) from the available data of the Investor/s before allowing him/ her access to avail the One Time Mandate facility (the Facility). If for any reason, the AMC is not satisfied with the replies of the Investor/s, the AMC has at its sole discretion the right of refusing access without assigning any reason/s to the Investor/s.
11. It is clarified that the Facility is only with a view to accommodate / facilitate the Investor/s and offered at the sole discretion of the AMC. The AMC is not bound and/or obliged in any way to give access to the Facility to Investor/s.
12. The Investor/s shall check his/ her account records carefully and promptly. If the Investor/s believes that there has been a mistake in any transaction using the Facility, or that an unauthorized transaction has been effected, the Investor/s shall notify the AMC immediately. If the Investor/s defaults in intimating the discrepancies in the statement within a period of fifteen days of receipt of the statements, he waives all his rights to raise the same in favor of the AMC, unless the discrepancy/ error is apparent on the face of it. By opting for the facility the Investor/s hereby irrevocably authorizes and instructs the AMC to act as his/ her agent and to do all such acts as AMC may find necessary to provide the Facility.
13. The Investor/s shall at all times be bound by any modifications and/ or variations made to these Terms and Conditions by the AMC at their sole discretion and without notice to them.
14. The Investor/s agrees and confirms that the AMC has the right to ask the Investor/s for an oral or written confirmation of any transaction request using the Facility and/ or any additional information regarding the Account of the Investor/s.
15. The Investor/s agrees and confirms that the AMC may at its sole discretion suspend the Facility in whole or in part at any time without prior notice.
16. The Investor/s shall not assign any right or interest or delegate any obligation arising herein.
17. The Investor/s shall take responsibility for all the transactions conducted by using the Facility and will abide by the record of transactions generated by the AMC. Further, the Investor/s confirms that such records generated by the AMC shall be conclusive proof and binding for all purposes and may be used as evidence in any proceedings and unconditionally waives all objections in this behalf.
18. The Investor/s agrees that use of the Facility will be deemed acceptance of the Terms and Conditions and the Investor/s will unequivocally be bound by these Terms and Conditions.

- One STP Enrolment Form can be filled for one Scheme/Plan/Option only.
- Investors are advised to read the Key Information Memorandum(s) (KIMs) and Scheme Information Document(s) (SIDs) of the Transferee Scheme(s) and Statement of Additional Information (SAI) carefully before investing. The SIDs / KIMs of the respective Scheme(s) and SAI are available with the ISCs of Axis Mutual Fund, brokers/distributors and also displayed at the Axis Mutual Fund website i.e. www.axismf.com
- Unit holders should note that unit holders' details and mode of holding (single, joint, anyone or survivor) in the Transferee Scheme will be as per the existing folio number of the Transferor Scheme, Units will be allotted under the same folio number. Unit holders' names should match with the details in the existing folio number, failing which; the application is liable to be rejected.
- STP offers unit holders the following two Plans:
 - Systematic Transfer Plan (STP)
 - Capital Appreciation Systematic Transfer Plan (CapSTP)

Investor's can opt for any of the above facility.

Systematic Transfer Plan (STP) offers transfer facility at Daily, Weekly, Fortnightly, Monthly and Quarterly intervals.

Capital Appreciation STP (CapSTP) offers transfer facility at Weekly, Monthly and Quarterly intervals. If no frequency is chosen, Monthly frequency shall be treated as the Default Frequency.

- Under the CapSTP-Weekly Interval, unit holders will be eligible to transfer the entire capital appreciation amount (minimum ₹ 500) by way of capital appreciation from Monday to Friday.

Monthly Interval, unit holders will be eligible to transfer the entire capital appreciation amount (minimum ₹ 500) by way of capital appreciation on the 1st, 7th, 10th, 15th or 25th of each month.

Under the CapSTP-Quarterly Interval, unit holders will be eligible to transfer the entire capital appreciation amount (minimum ₹ 1,000) by way of capital appreciation on the 1st, 7th, 10th, 15th or 25th of the first month of each quarter. The beginning of the quarter could be of any month e.g. January, March, July, September, etc. Please note that no transfers will take place if there is no minimum capital appreciation amount (except for last transfer leading to closure of account). The capital appreciation, if any, will be calculated from the enrolment date of the CapSTP under the folio, till the first transfer date. Subsequent capital appreciation, if any, will be the capital appreciation between the previous CapSTP date (where CapSTP has been processed and paid) and the next CapSTP date.

- The provision of 'Minimum Redemption Amount' as specified in the Scheme Information Document(s) of the respective designated Transferor Schemes and 'Minimum Application Amount' specified in the Scheme Information Document(s) of the respective designated Transferee Schemes will not be applicable for STP.
- Unit holders are required to fill in either the number of instalments or the enrolment period in the enrolment Form, failing which the Form is liable to be rejected.
- In case Day of Transfer has not been indicated under STP- Weekly frequency, Wednesday shall be treated as Default day.
- In case, the Enrolment Period has been filled, but the STP Date and/or Frequency (Monthly/Quarterly) has not been indicated, Monthly frequency shall be treated as Default frequency and 10th shall be treated as Default Date.
- The application for STP/ Cap STP enrolment - Monthly & Quarterly Interval should be submitted at least 7 working days and not more than 90 days before the desired commencement date.
- Please refer below table for min. no. of installments and minimum amount per installment:
